

Software Developer

LVD Company

LVD is an international company active in markets around the world. Our global footprint includes production facilities and sales and service offices located in more than 45 countries.

From simple beginnings as a supplier of press brakes to our presence today as a global source of state-of-the-art metal forming equipment, we remain a family company dedicated to a single purpose: supplying customers with the best technology, in the most reliable equipment.

Job description

After you have finished an extensive training program, you will develop 3D graphical software for our CAM products.

Profile

- You are an engineer with a Bachelor's or Master's degree in IT, DAE (Digital Arts & Entertainment) or math;
- You have a solid spatial awareness;
- You are passionate about algorithms and applied sciences;
- You are more than familiar with C# or other object oriented language;
- You are prepared to code in C# and .NET;
- You have knowledge of operating systems (Windows), networking and SQL;
- Having experience with ACIS, Open GL, or another 3D graphical kernel is an advantage.

In addition to these technical competences, we also expect following personal skills:

- You are a team player;
- You work in an orderly manner, with a scrupulous attention to details;
- You prefer an analytical approach, 'trial and error' is not your style;
- You are a problem solver;
- You keep everything well-documented;
- You are proficient in English and Dutch.

We offer

We offer a competitive salary package with perks, social benefits and training & career possibilities.

How to apply?

You can apply via our renewed website, via our LinkedIn careers page or you can send a mail with a motivation letter and curriculum to jobs@lvd.be. Please don't forget to mention the title of this job opening.
